## Professional Summary

I am a motivated and detail-oriented Software Engineering student with strong knowledge in Full Stack Development, Manual QA, and Information Systems. I have experience in Java, React.js, PHP, and MySQL, and I have worked on projects that integrate APIs and Firebase authentication. I also have over 15 years of experience in team leadership, logistics, and management at Super-Pharm, where I developed solid problem-solving and analytical skills.

## Education

College of Management – Haifa Campus (2022–2025)
Practical Software Engineering (Practical Engineer)
- Java (Grade 92), OOP (Grade 91)
- HTML, CSS, JavaScript (Grades 98–100)
- Full Stack Development: PHP, React.js, MySQL, Firebase
- Manual QA, Information Systems, Linux, Operating Systems
- Teaching Assistant – Java (2nd–3rd year)
- Lecturer Training Course – College of Management

Pardes Comprehensive High School (Graduated 2006)
- Full Bagrut Diploma
- 10 units Computer Science, 5 units Chemistry

## Practical Java Experience (2022–2024)

Assisted students as a Teaching Assistant in Java courses until graduation.

## Final Project – TripMaster Web Application

I developed a web application for trip planning that offers personalized travel recommendations based on user preferences, destination, and trip duration.
Technologies: React.js (React Hooks), HTML, CSS, JavaScript, PHP, MySQL, Firebase, Google API

Key Features:
- Full Stack development from design to deployment
- API integration and dynamic data handling
- Personalized algorithm for trip recommendations
- Demonstrates skills in system architecture and UI/UX design

## Work Experience

Super-Pharm, Israel (2009–Present)
Warehouse & Logistics Manager | Commercial Manager | Team Leader

Responsibilities:

- Manage warehouse operations, logistics, and supply chain
- Oversee team members and assign daily tasks
- Coordinate medicine orders, inventory, and supplier communication
- Handle store operations and shift management
- Supervise the sales floor and customer experience

Achievements:
- Led and trained multiple teams over 15 years
- Improved operational efficiency and delegation
- Recognized for leadership and organizational excellence

## Technical Skills

Programming & Web Development: Java, JavaScript, PHP, HTML, CSS, SQL, MySQL, React.js (React Hooks)
Backend & Tools: PHP, MySQL, Firebase, API Integration
Testing & QA: Manual QA, Debugging, Test Design
Version Control & Systems: Git (Basic), Linux (Basic), Operating Systems

## Additional Skills

- Strong leadership and team management
- Experience in training and mentoring students
- Analytical and problem-solving mindset
- Fast learner and adaptable to new technologies
- Excellent communication and time management skills
